xr25_diag: a diagnostic software for old Renault cars

Javier L. Gómez

October 19, 2016

1 XR25 car interface

The circuit in figure 1 is provided for reference; other schematics can be found on the net. The `RXD` must be connected to the RXD pin on a FT232RL-based serial to USB converter, such as the Arduino USB mini.

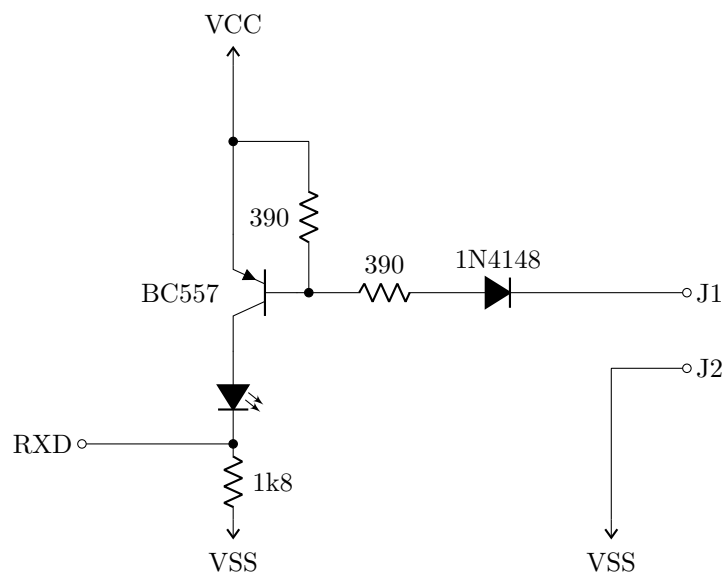

Figure 1: XR25 receiver schematic

See the figure 2 to known how to connect `J1` and `J2` to the car diagnostic connector.
